Donated Food Checklist

Both SAFETY (whether a food is free of disease-causing bacteria and their toxins) and QUALITY (whether a food looks and smells acceptable to eat) should be kept in mind when examining donated food.

Beware of these signs that food may be UNSAFE to eat.

Foods Stored at Room Temperature

Cans
 Too crushed to stack on shelves or open with a manual can opener Crushed immediately under the double (end) seam Moderate/severe dents at the juncture of side and double (end) seam Rust pits severe enough to pierce the can Swollen or bulging ends Holes, fractures, or punctures Evidence of leakage Signs of spoilage (spurting; unusual odor or appearance) when opened Baby food or formula past the expiration date Missing label
Glass Jars
Home-canned instead of commercially canned
Raised, crooked, or loosened lid
Damaged tamper-resistant seal
Cracks or chips
Signs of spoilage (discolored food; cloudy liquid)
Dirt under the rim
Baby food past the expiration date
Paperboard Cartons
Torn or missing inner packaging in cartons that are slit or opened
Evidence of insects
Plastic Containers
Damaged tamper-resistant seal
Signs of spoilage (mold, off odor)
Baby food past the expiration date

Foods Stored in the Refrigerator Lukewarm food (above 40° Refrigerator temperature) Signs of spoilage (unusual odor or appearance, molds) Unsuitable containers (and/or covers) that allow food to be contaminated Uncertain handling "history" (questionable reputation of food source) Damaged tamper-resistant seals if commercially packaged
Foods Stored in the Freezer Evidence of thawing (ice on the food or leaking) Unsuitable packaging that allows food to be contaminated
IF IN DOUBT, THROW IT OUT!
Don't rely on look or smell. Foods that cause food poisoning may look fine and smell acceptable.

Never taste suspicious foods!
