

## Phase 1: The Demographics of Dementia in Your Community

1. **Define your community**, meaning the population or geographic area that shares a common goal of creating a dementia friendly community.

Community \_\_\_\_\_ 2016 Estimate Clark County \_\_\_\_\_

2. **Gather the following demographic information about your community.** Add your findings to A, B, and C below. You will also add your findings to page 2 of the Community Assessment in Phase 2.

- A. Estimate your population over the age of 65 years. Divide by 9 to estimate the number of people over 65 with dementia.

\_\_\_\_\_ 266940 \_\_\_\_\_ ÷ 9 = \_\_\_\_\_ 29660 \_\_\_\_\_ people over age 65 with dementia

- B. Estimate your population over the age of 85 years. Divide by 3 to estimate the number of people over 85 with dementia.

\_\_\_\_\_ 26051 \_\_\_\_\_ ÷ 3 = \_\_\_\_\_ 8684 \_\_\_\_\_ people over age 85 with dementia

- C. Estimate your population with dementia that lives alone. Divide your estimate of the number of people over age 65 with dementia (from question A) by 7 to estimate the number of people with dementia living alone.

\_\_\_\_\_ 29660 \_\_\_\_\_ ÷ 7 = \_\_\_\_\_ 4237 \_\_\_\_\_ people with dementia living alone

3. **Determine diverse and underserved populations** that would benefit from having dementia resources tailored for them. Determine whether your community has these populations. Check all who are part of your community.
