**Administrator's Report**  
**Commission on Aging**  
**01/14/2020**

**Budget Updates:**

A. Public Health Approach – Health Aging at every stage of life

- 1.Connecting and convening multiple sectors and professions that provide the supports, services, and infrastructure to promote health aging.
- 2.Coordinating existing supports and services to avoid duplication of efforts, identify gaps, and increase access to services and supports.
- 3.Collecting data to assess community health status (including inequities) and aging populations needs to inform the development of interventions.
- 4.Conducting, communicating and disseminating research findings and best practices to support healthy aging.
- 5.Completing and supplementing existing supports and services, particularly in terms of integrating clinical and population health approaches.
