

Nevada Early Hearing Detection and Intervention

The purpose of the Nevada Early Hearing Detection and Intervention (EHDI) Program is to ensure all children in Nevada are screened for hearing loss at birth and those identified with hearing loss receive timely and appropriate audiological, educational and medical intervention. Nevada EHDI promotes the national EHDI goals and timelines developed by the Joint Committee on Infant Hearing (JCIH) and the Centers for Disease Control and Prevention (CDC).

- 1 - Before **ONE** month of Age: **Hearing Screening** for all babies

- 3 - Before **THREE** months of Age: **Diagnostic Audiology** by an audiologist if baby did not pass hearing screening

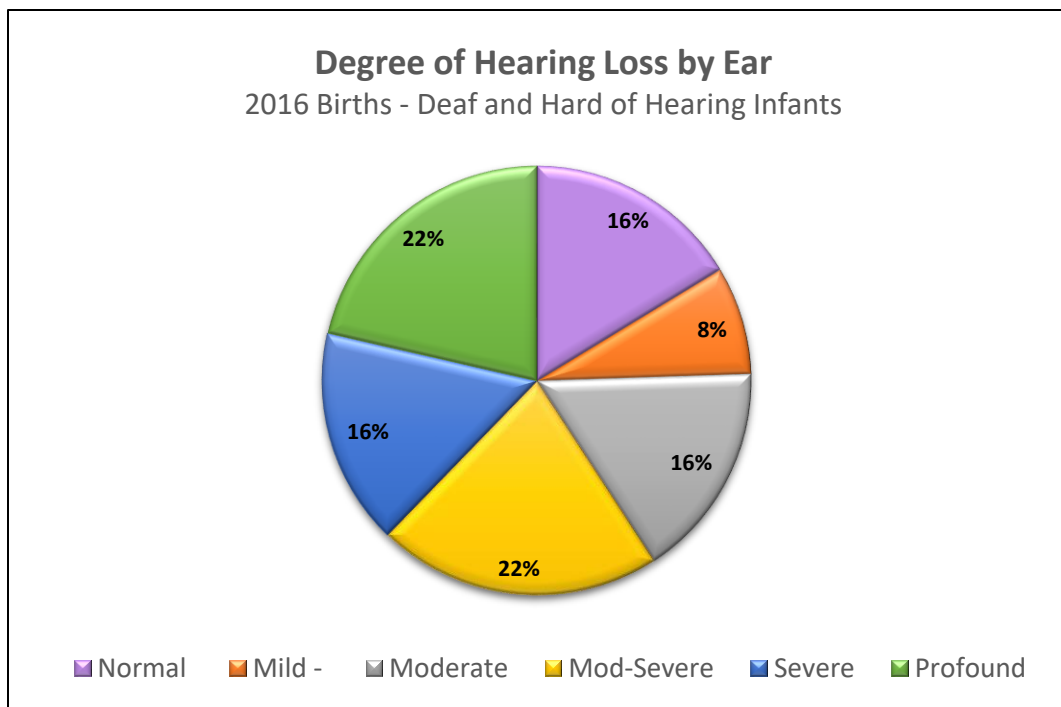

- 6 - Before **SIX** months of Age: **Early Intervention** if baby is diagnosed with hearing loss
