Data Informed

Monitor on continuous basis

vs

Annual scramble and explanation

Data Informed

Shared context, assure all have seen the same information

vs

Annual scramble and explanation

Older versions, incomplete data and inaccessible. Timely data is important in discussions, it allows users to focus discussion on the implications of the data rater than trying make sure very one is on the “same page”
Second, Timely access over the year allows for **corrective action** rather than **corrective explanation**

Data Informed

Incorporate Funder Metrics with SILC metrics

Vs

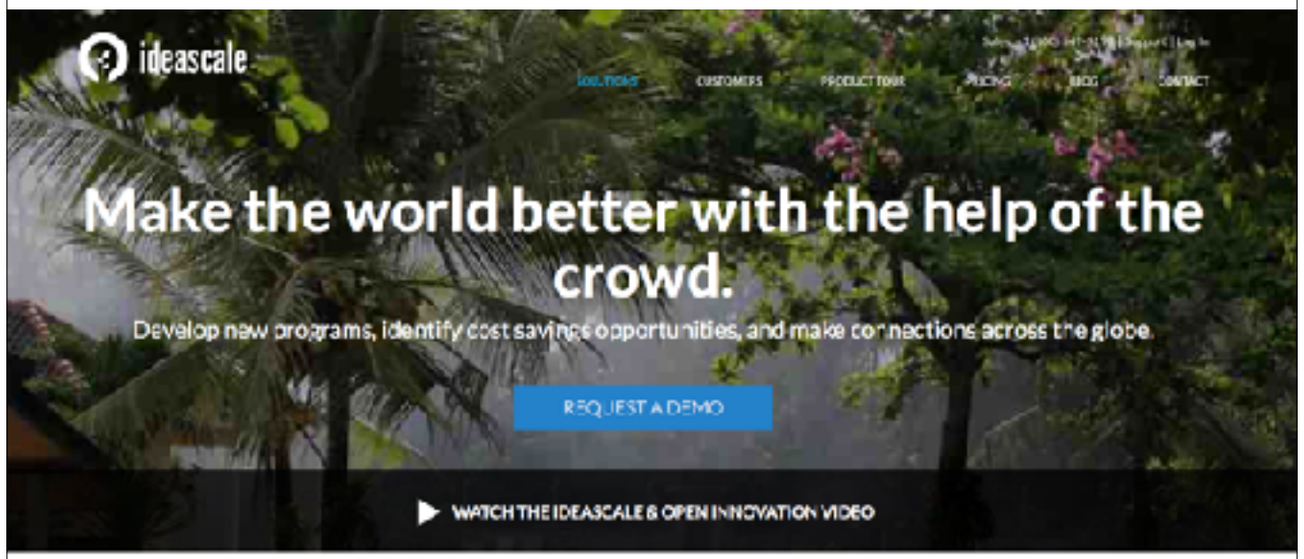
Meet metrics not community needs

Funder accountability is mandatory but too often it becomes the end game. Ensuring that funder goals are part of the process while including developing community directed metrics. For example, tracking the “digital divide” of PWD

Developing Advocacy

- Partner with Advocate Training (Partners in Policymaking, DD Council and Nevada PEP)
- Imbue IL philosophy into these trainings.
- Partner in the fullest sense, in-kind, trainees and some funding for leadership
- Specifically teach Board skills for self-advocates

SPIL Needs Assessment



IdeaScale uses crowdsourcing to offer nonprofit institutions the ability to collaborate with start-ups, citizens, researchers who work together to make the world a better place.
