

## State Plan Revision Input—Gini Cunningham

### Recommendation 16: Volunteers

My hope is that we can make volunteerism an integral part of the Nevada State Plan on Alzheimer's Disease. I know that every community throughout our state has individuals who would like to spend time in a useful and valuable pursuit and Alzheimer's Education might be a perfect match. I see our Task Force reaching out to members of senior centers, libraries, and care facilities to invite individuals to on-line training, education, and current information on this disease and other dementias. Through these individuals we will be able to disseminate the latest research and advancements in finding a cure or reversal for Alzheimer's as well as direct people to our many helpful sites and sources. Communication with up-to-date insight and information will enlighten the citizens of our state as well as relieve some of the stress and worry associate with Alzheimer's and especially those who serve as caregivers.
