

Public Statement: 12/16/2020

Dr. Kerri Milyko, BCBA-D, LBA(NV)

Last Meeting as Board Member

I would like to thank former governor Sandoval for the appointment – it was an amazing opportunity to serve the field of behavior analysis in this manner and I hope I protected our constituents in the best way that I could. I wish the new board nothing but the best, with the opportunity to make change and protection

I challenge the next board to create policies and procedures that support the operations of the board. I suggest that the new board members attend other board meetings of long, existing board meetings like the board of massage therapists or chiropractor, or pharmacy. I think there is a lot to learn from them and to see how we can do things differently and make improvements. There are also opportunities to network or learn from Boards if you sign up via Certemy.

I also encourage the board to look at our regulations and the frequency of background checks, to beef up board member training, and be purposeful in arranging outreach programs. You will see that there is a difference between how they operate. Again, there is a lot to learn about these things by learning from other boards or getting regulatory training.

I know you will do great things and wish you nothing but the best. Thanks for the opportunity of working with you all.
