*As of 9/30/2021: The data for the period has 98 people waiting for direct services funding, 68 of the cases waiting are over 90 days with the oldest at 267 days. There were 32 cases made active (Placed this Month) to align with the funding available and the costs estimated within the caseload. The program continues to identify and prioritize consumers with service needs related to prevention of placement OR transition from a care facility. We anticipate the waiting list to continue to rise. The waitlist will likely continue to grow unless additional resources for the end services can be increased. The program had a higher number than usual of withdrawn goals and cases closed due to the inability to make contact. The programs Performance Indicators have exceeded targets established with 94% of all consumer goals being met in Quarter 1 of SFY2022.

9/5/21: Referrals and caseload are in the process of recovery following the significant declines that occurred due to the moratorium's related to COVID-19. Of the 19 delayed services identified in June, 12 have since been initiated, and three (3) have been declined. It can be noted that the number of services waiting may be inflated due to untimely data entry occurring past the date of data generation for reporting. Currently, the early intervention services system is experiencing a provider shortage which may impact the ability to provide services in a timely manner.
