- Administration on Community Living (ACL) currently has 2 grants with Nevada: The Lifespan Respite & the Enhancement grant.
- The Lifespan Respite grant is in its second year of a three-year grant that is developing a data minimum set agreement with state partners who provide respite services across Nevada.
- The main goal is to be able to develop an annual report that shows information on Nevada's caregivers and their support needs. The data will be shared statewide to allow opportunities to advocate.
- Having the information available will also provide options to collaborate and find gaps in respite and supportive services.
- A flyer containing information on the Emergency funds for Caregivers should be released in the next couple of weeks.
- More information on the goals for respite training and education, building and strengthening the workforce will be shared soon.
- The Enhancement Grant is a 5-year grant which share like items with the Lifespan Respite grant. This grant can help develop and coordinated strategies to help recruit respite workers with internships and expand volunteers.
- Nevada was recently selected as a pilot site for field testing training on core competencies for respite workers. The purpose of this pilot program will be to build and test respite workforce recruitment using the tools developed. Training and retention programs would meet the needs of families caring for individuals of any age or condition.
- The goal over the next couple of years will be to obtain additional support for best practices in recruitment, retention, and training.
- With the three projects having similar goals and objectives, they will be tied together as one single project instead of three separate ones.
- Nevada Care Connection will still help identify caregivers throughout the state and connect them with services.

- It is estimated to take most of 2022 to collect and develop the Olmsted Plan.
