## What is ATAP?

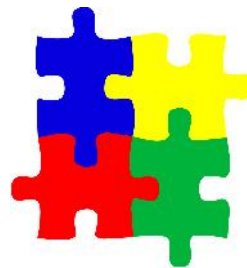

The Autism Treatment Assistance Program (ATAP) is a statewide program that provides temporary support and funding to pay for evidence-based treatment and therapy for children with an Autism Spectrum Disorder (ASD)

ATAP offers a variety of plan types to enable choice while supporting evidence-based treatments. ATAP can also assist with co-pays and deductibles for therapy when the family cannot access their insurance due to excessive cost.

## Who is eligible for ATAP?

Children who reside in Nevada and are between the ages of 18 months-19 years who have an ASD diagnosis

Interested parties may call (775) 687-4210 to start the application. A portion of the application can be completed over the phone and the other portion is mailed and is to be completed within 30 days.

## Waitlist, Providers, and More!

### Waitlist

ATAP currently has a waitlist. Families may be placed on the waitlist once an application and all supporting documentation has been completed.

### Providers

ATAP has agreements with numerous providers statewide. When a family has been chosen to receive funding, they may choose from our provider list.

### Not Covered By ATAP

Respite, medicines, supplements, private school placements, classroom paraprofessionals and treatments which are not evidence-based.
