

# Nevada Interagency Coordinating Council

## Notes on Data Synthesis and Themes Identified

This document can be used to take notes prior to and during the retreat. It should be based on reviewing the document, *Summary of Findings*, which summarizes information gathered from families, key partners, and providers as part of the strategic planning process. Time will be spent at the retreat reviewing the information as a whole group and in small groups.

***What surprised you about the information gathered?***

***What was affirming or concerning?***

***What implications do you see for the ICC's work?***
